3 in 1

LOCK SYSTEM from **MUL-T-LOCK**®

A simple idea: the user changes lock combinations by changing keys.

Each **3 in 1** lock includes:

- ✓ High-security lock cylinder.
- ✓ **GREEN** dotted keys and card set.
- ✓ **YELLOW** dotted key and card set (in pouch).
- ✓ **RED** dotted key and card set (in pouch).

To START :

- The lock is installed by a Professional Locksmith.
- Use the **GREEN** dotted key.

Interactive™ Patented Key Control

MUL-T-LOCK's unique patented Interactive Key Control System gives the user the confidence they need to know that they are the only ones who can obtain additional keys. Protected by MUL-T-LOCK's "Key Order Card", which is signed by the user to prevent unauthorized key duplication. Authorized MUL-T-LOCK Dealers must verify the signature on the "Key Order Card" with the signature on a photo identification of the user. Only Authorized MUL-T-LOCK Dealers can service MUL-T-LOCK Interactive Key Control Systems.

When you need to CHANGE your lock:

- Open the **YELLOW** pouch, insert the yellow dotted key and operate the lock. The green key is now disabled.
- Use the **YELLOW** dotted key.

To CHANGE your lock AGAIN:

- Open the **RED** pouch, insert the red dotted key and operate the lock. Now the yellow key is also disabled.
- Use the **RED** dotted key.
